TECHNICAL SKILLS

LANGUAGES

JavaScript (ES6+) · Java · Python · C · AL

FRONTEND

React.js · HTML5 · CSS3 · Tailwind CSS · Bootstrap

BACKEND

Node.js · Express.js · REST APIs · JWT Auth

DATABASES

MongoDB · MySQL

AUTOMATION & TOOLS

N8N · Git · GitHub · Postman · Figma

CORE SKILLS

Data Structures & Algorithms · Object-Oriented Programming (OOP) · Problem Solving · RESTful Architecture

ERP / ENTERPRISE

MS Dynamics 365 · Business Central · RDLC Reports

EDUCATION

B.Tech – Computer Science & Engineering
Dr. A.P.J. Abdul Kalam Technical University, Lucknow
2022 – 2026

Class XII – Science (BSEB)
M.V.G. High School
2020

Class X (BSEB)
M.V.G. High School
2018

CERTIFICATIONS

- Java Full Stack Development – Croma Campus
- Microsoft Dynamics 365 – Business Central & AL Development Workshop
- IIOT – Thingworx & Industrial Communication Protocols

PROFESSIONAL SUMMARY

Results-driven **MERN Stack Developer** and final-year B.Tech (CSE) student with hands-on experience building scalable full-stack web applications using **React.js, Node.js, Express.js, and MongoDB/MySQL**. Proficient in REST API design, JWT-based authentication, role-based access control (RBAC), and workflow automation using **N8N**. Experienced with Microsoft Dynamics 365 Business Central and AL development. Adept at translating business requirements into clean, maintainable code. Seeking a full-time software development role to contribute to impactful, production-grade products.

INTERNSHIP EXPERIENCE

Java Full Stack Developer Intern — Jul 2025 – Aug 2025
Croma Campus, New Delhi

- Designed and developed an **Employee Management System** using Java, Spring Boot, and MySQL with full CRUD functionality.
- Built a responsive, component-based UI using HTML, CSS, and JavaScript, improving usability across devices.
- Engineered RESTful APIs to streamline data operations, reducing API response time by optimising query logic.
- Collaborated in an Agile environment, participating in code reviews and iterative feature delivery.

PROJECTS

Library Management System (LMS) — Live ↗
React.js · Node.js · Express.js · MongoDB · JWT

- Built a full-stack, role-based LMS supporting separate **Admin** and **Student** portals with secure **JWT authentication** and RBAC.
- Admin module features: book & user management, issue/return tracking, automated **fine calculation engine**, and analytics dashboard.
- Student module: view issued books, initiate returns with real-time fine computation, and personal activity reports.
- Designed and implemented **RESTful APIs**; integrated frontend with backend via Axios with centralised error handling.

Employee Management System — GitHub ↗
React.js · Node.js · Express.js · MySQL

- Developed a full-stack platform with end-to-end **CRUD operations** for employee data, departments, and roles.
- Built a normalised **MySQL** schema and a RESTful Express.js backend; integrated React frontend with reusable, modular components.
- Implemented server-side validation and responsive UI, ensuring cross-browser compatibility.

StyleHive – E-Commerce Website — Live ↗
HTML5 · CSS3 · JavaScript (Vanilla)

- Built a fully **responsive, mobile-friendly e-commerce website** from scratch using only HTML, CSS, and JavaScript — no frameworks.
- Implemented **dynamic product listings** with category-based filtering using efficient DOM manipulation and structured data handling.
- Developed complete **shopping cart functionality** including add/remove items, quantity updates, and smooth user interactions entirely in vanilla JS.

Employee Payroll Ledger — MS Dynamics 365 BC · AL · RDLC

- Developed a custom payroll **extension in AL** for Microsoft Dynamics 365 Business Central with Employee Master, Setup, and Ledger tables.
- Built Employee List and Card pages with **automatic number series**
